

深植半導體過濾 密科博 明年底上櫃

密科博執行長王靖，資歷豐富，擁有多項國際過濾設計專利。圖 / 業者提供
Mr. Kenneth Wong, CEO of Mycropore Corporation, has more than 20 years of industry experience, owns multiple patents in filtration, ranging from filter design to applications.

密科博股份有限公司正式宣布在台灣成立營運總部，成功切入半導體過濾市場，並取得全球前3大半導體廠認證的密科博 (MYCROPORE) 股份有限公司，看中台灣對科技業的支持，從新加坡轉戰來台，在台灣新竹的營運總部最近正式營運啟用；明年上半年，密科博規畫在新竹設立生產工廠與研發實驗室，將微電子與水處理的專利過濾產品深耕台灣，協助客戶解決高階製程的挑戰。

長期投入過濾微汙染管控業務24年，同時擁有多項國際過濾設計專利的密科博執行長王靖 (Kenneth Wong)，曾擔任美商英特格等公司的資深副總裁，對於選擇在新竹成立營運總部表示，台灣對於科技業的支持與投資，以及半導體產業具有完整的產業供應鏈，讓經營團體深具信心，決定融入台灣，先從服務台灣客戶做起，再擴展到全球的客戶端。

全球目前有超過200家的IC半導體製造工程，但有關的半導體過濾市場，長達4分之1個世紀，都

被2家美商公司壟斷，密科博執行長王靖說，該公司在半導體濾心產品的專利與開發，已經取得台灣一線大廠的驗證及訂單，也取得以色列第一大水處理公司的海水淡化濾心業務。

王靖強調，密科博除具有半導體濾心的卓越產品外，更具有產品的合理價格，經過幾年的耕耘與成功，已將濾心產品導入台灣、美國和韓國的先進製程晶圓廠，強調密科博的專利濾心產品，可直接取代，半導體廠無須額外做設備修改，節省成本支出。

密科博是一家擁有過濾器專利技術的領導廠商，主要的產品開發方向是以減少設備改造，提高產品性能，進而取代現有產品，降低認證風險和時間，快速導入市場，同時持續開發新世代產品，協助客戶解決高階製程挑戰，提升良率；立足台灣的密科博公司，產品已取得台灣、美國及韓國等全球前三大半導體公司的認證，並透過安侯建業會計師事務，規畫明年底在台上櫃。

PLANTING ITS ROOTS IN SEMICONDUCTOR FILTRATION MYCROPORE IS SET FOR TAIWAN IPO END OF 2016

2015 December 16, 04:10

Mycropore Corporation has officially announced its strategic headquarter to be located in Taiwan after its successful qualifications by the top 3 global semiconductor wafer fab plants.

Given the strong support environment towards high technology industries in Taiwan, the company has relocated its operation headquarter from Singapore and the Taiwan-Hsinchu office is now operational.

In the coming year, Mycropore Corporation will also be setting up its production facility and product development centre in Taiwan.

Given the proximity to key customers in Taiwan, Mycropore Corporation will be able to develop patented solutions and products to support the advanced technological challenges of its clients.

Mr Kenneth Wong, CEO of Mycropore Corporation, has more than 20 years of industry experience, owns multiple patents in filtration, ranging from filter design to applications.

Formerly, a Senior Executive with various American Multi-National Corporation (MNC) and the Vice President of Entegris Inc., Mr. Kenneth Wong envisage the setup of Mycropore Corporation in Taiwan will allow the company to develop more solutions and products quickly to address the stringent need of the semiconductor industry for better products at reasonable costs, both in Taiwan and globally.

With more than 200 wafer-fab plants worldwide, the semiconductor consumable filter market, however, has been dominated by only 2 key American suppliers for a quarter of a century. With the inception of Mycropore, a much-welcomed new player, Mycropore Corporation has successfully developed patented solutions and products that have been qualified by and orders have been streaming in steadily from top tier wafer fabs in Taiwan. The company has also secured water treatment filter business from multiple large desalination plants in Israel.

Mr. Kenneth Wong emphasized that the company not only produce excellent products, but more importantly, products are now available at very competitive pricing to the industry. With a strong team of staff who has both know-how and technology,

no wonder many of its products have already been qualified by other top tier wafer fabs in USA, Korea and Singapore.

Mycropore's products are designed to work as a "plug-and-play" solution, fitting into existing production equipment without the need for equipment modifications, thereby reducing qualification time and risks. The final outcome is good products at a lower cost of ownership for its clients.

About Mycropore: Mycropore Corporation possesses patented filtration technology and is a poised to be a preeminent market leader.

Mycropore offers application-focus solutions enabling manufacturing competitiveness and economic sustainability for industries in a fast changing environment demanding more responsive and adaptable solutions.

With a combined global experience of more than 100 years among the core founders of the company, Mycropore works closely with key industries to offer innovative, integrative and competitive products and solutions.
